

# Building and Commercial Space Digital Directory Solution

## Easy Editing Suite

22Miles' content/directory designer provides a wide-ranging toolbox of media inserts to manage and communicate any mix-use property's design, tenant info, and unique branding styles. Added widgets, quick-edit settings, and HTML-type visual filters can provide real-time property information. The editing portal is meant for daily user's straightforward and quick management, never requiring code or programming. Easily insert any data listings with automation, property management systems, or manual tenant directory design for any display, video wall, or even touchless touch experience.

**Company Logo**  
Add your company's Logo

**Digital Directory**  
List of tenants, room, business or other.

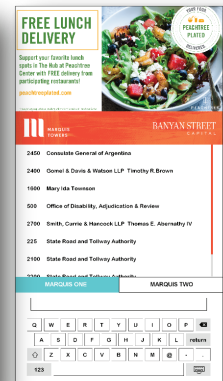

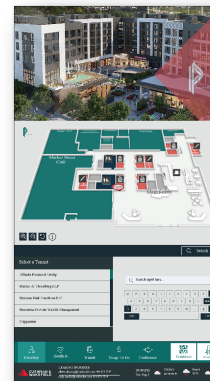

**Background Image or Video**  
One or a series of rotating background images or videos

**Media Gallery**  
Rotating images, promotional videos and more.
