The Solutions

For the most ambitious display projects, the most challenging installations, Nanolumens partners with clients to create uniquely compelling, immersive LED visualization. Nanolumens displays are ultra-thin and lightweight, energy efficient, and available in any size, shape, or curvature through world-class proprietary technology.

22Miles' platform provides accessible, seamless, and secure customizable digital signage, wayfinding, and visual communications. 22Miles brings limitless content experiences from idea to large-scale installation with fully customizable integrations.

The Partnership

22Miles and Nanolumens bring customers a consolidated solution, improving efficiency with the utmost flexibility to customize the size and shape of LED displays. Nanolumens LED displays combined with 22Miles' flexible system enable users to have a forward-thinking display system that provides digital connectivity, visual communications, media management, and adaptive multi-point interactive experiences. The solutions include:

- Experience centers leveraging a mobile or touch remote-controlled solution making any LED interactive
- Corporate centers and lobby designs
- Stadium and arena walls
- Convention centers and large event walls
- Donor and alumni recognition walls
- Museums or other large centers want to have visual experiences in their space
