Space Utilization

Modern Workplace

Inspire your staff, manage your facility, and keep hybrid workforces aligned and on-mission with a suite of customizable visual communication tools.

Inform and Unite Your Workforce

Send and promote critical employee communications and seamless operations with omnichannel communications via screens, kiosks, video walls, and mobile – distributed per department or company-wide by 22Miles's intuitive interface. KPI and EMS data visualization and rich content APIs make it easy to update everyone in real time.

Simplify reservations, automate signage and event calendars, and centralize space and room management data to meet your unique needs.

Visual communication for any public sector environment or workplace

Design it your way - Use the Template Center to customize designs, corporate templates, and widgets, or modify pre-sets to work for your organization.

Take it to go - Instantly transfer any sign content to a mobile device with included Carry2Mobile technology.

Choose your Controls - Navigate interactive content via the display touchscreen or personal mobile device.

What are the plans and priorities for a **digital transformation** to your office or campus?

Brand Identity
Reinforce your company's vision with dynamic, visually stunning digital displays.

Space and Room Management
Simplify space management with seamless booking, calendar scheduling, and automated signage.

Facility Wayfinding
Welcome employees and visitors to the new office with interactive 3D wayfinding such as work space availability highlighting. Find facility or colleague locations, including meeting rooms and hot desks.

Mobile Application Experience
Essential information has never been easier to access. Carry2Mobile provides digital signage and communication information from a single QR Code scan.

Alert Management
Omni-channel reach for crucial Notifications An informed community is a safe community.
Customer & Visitor Experience
Streamline operational security with check-in instructions, guest badge readers, and interactive virtual receptionists on entry point signage.

Manage any size deployment from **50** to **50,000**

Limitless Possibilities for Connection

22Miles seamlessly incorporates your organization's essential information, emergency alerts, news, stats, events, and other data feeds vital to you into singular system management automation. These feeds will update dynamically on their own, allowing you to perform your day to day activities with displays functioning independently in the background.

5. Custom UI Workflow
22Miles Book22 Plus suite provides custom design features to complement any organization's branding, widgets, and call to action features to meet department to individual-level needs.

6. Data-Driven Insights
Space utilization data insight dashboards promote workspace occupancy, employee safety, cleaning ready notifications.

Sustainably Smarter Signage

With just a 'Tap or Scan' of our laser engraved 'Sustainably Smarter Signage', ecoPUK provides the seamless delivery of content to mobile devices. We work with our partners to provide highly interactive, mobile digital experiences and our solution allows content to be managed and changed over time without the need to re-deploy signs or power any traditional electronic information screens. This highly cost beneficial approach simplifies the lifecycle challenges many corporations face every 3-5 years. It also importantly addresses growing sustainability and environmental concerns around powering an estate of digital panels across an organizaition.
